# Descriptive Geometry, as Applied to the Drawing of Fortification ANS Stereotomy

By Dennis Hart Mahan

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: .projected on either into their true lengths. Let LM be the axis, and ED a bounding element of another semi cylinder, the right section of which is a semidrcle; LM and EP being also in the given horizontal plane. It is proposed, with these data, to find the lengths of the, elements of tlie oblique cylinder intercepted between the vertical plane of A B O and the horizontal cylinder; the curve of rtght section of the oblique semi cylinder at any assumed point; and the development of the portion of it which lies between the given vertical plane and the horizontal semi cylinder. 1st. The simplest method of finding the true lengths of the elements between the vertical plane and horizontal cylinder will be to construct their projections on another vertical plane parallel to them. Let BN be the trace of such a plane on the...
